

# SLAY BITCH POSE

Ben - Belen - Kevin - David

1st Idea: controlling pitch and sound with body movement

2nd Idea: engaging in a movement conversation through pose detection

Final Idea: creating a code that proposes a choreography through image recognition.

# Posing recognition did not work

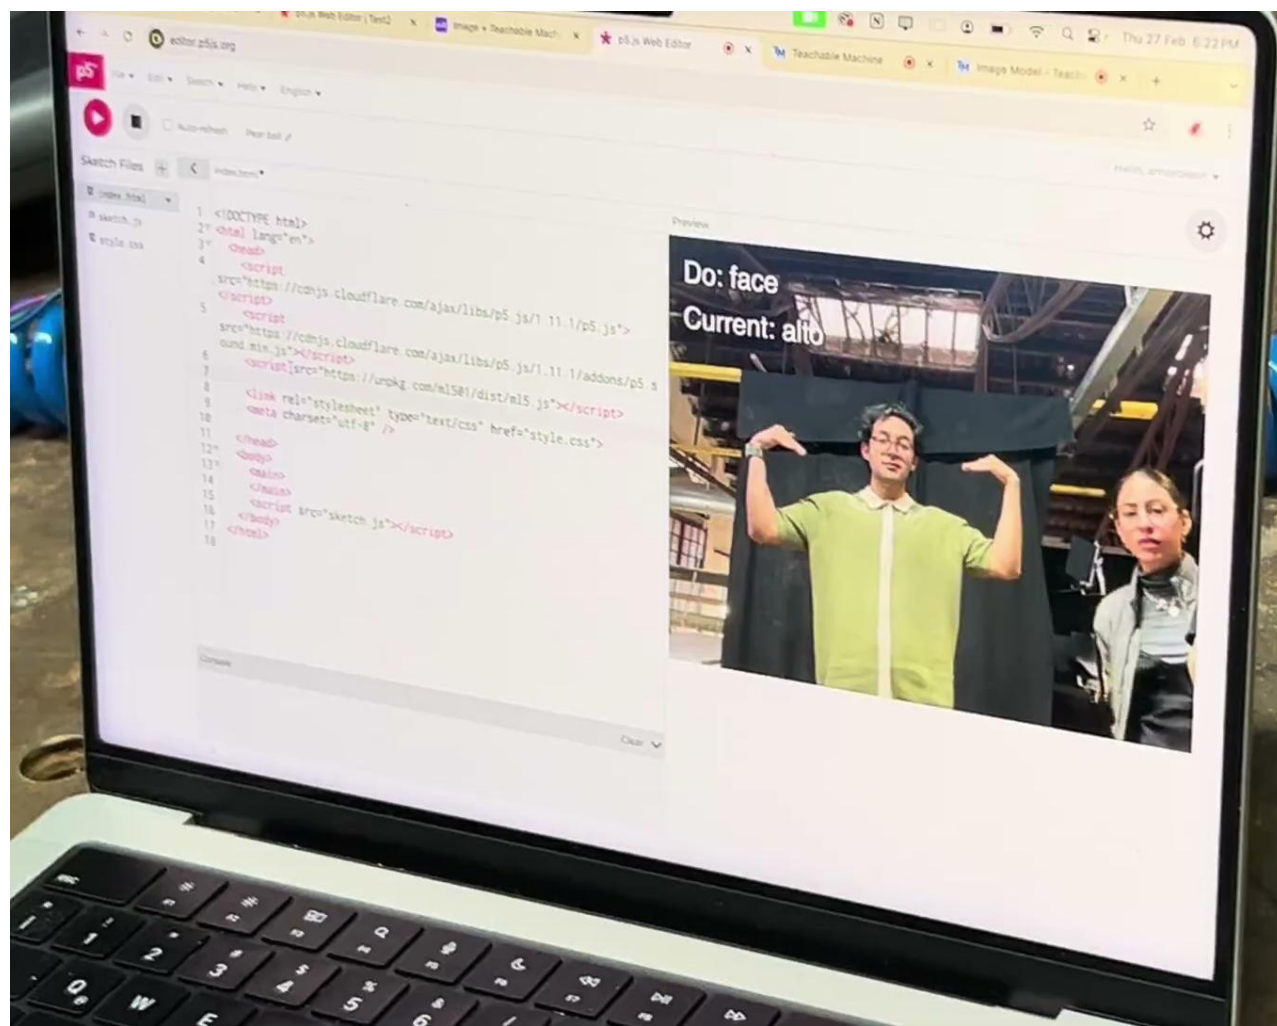

# Image recognition did

HELICOPTER

HELICOPTER

...the  
...boolean pre  
...ing the time the pose is held  
...draw() function now displays "Do: " followed by the  
...what to do.  
• The current label is also shown.

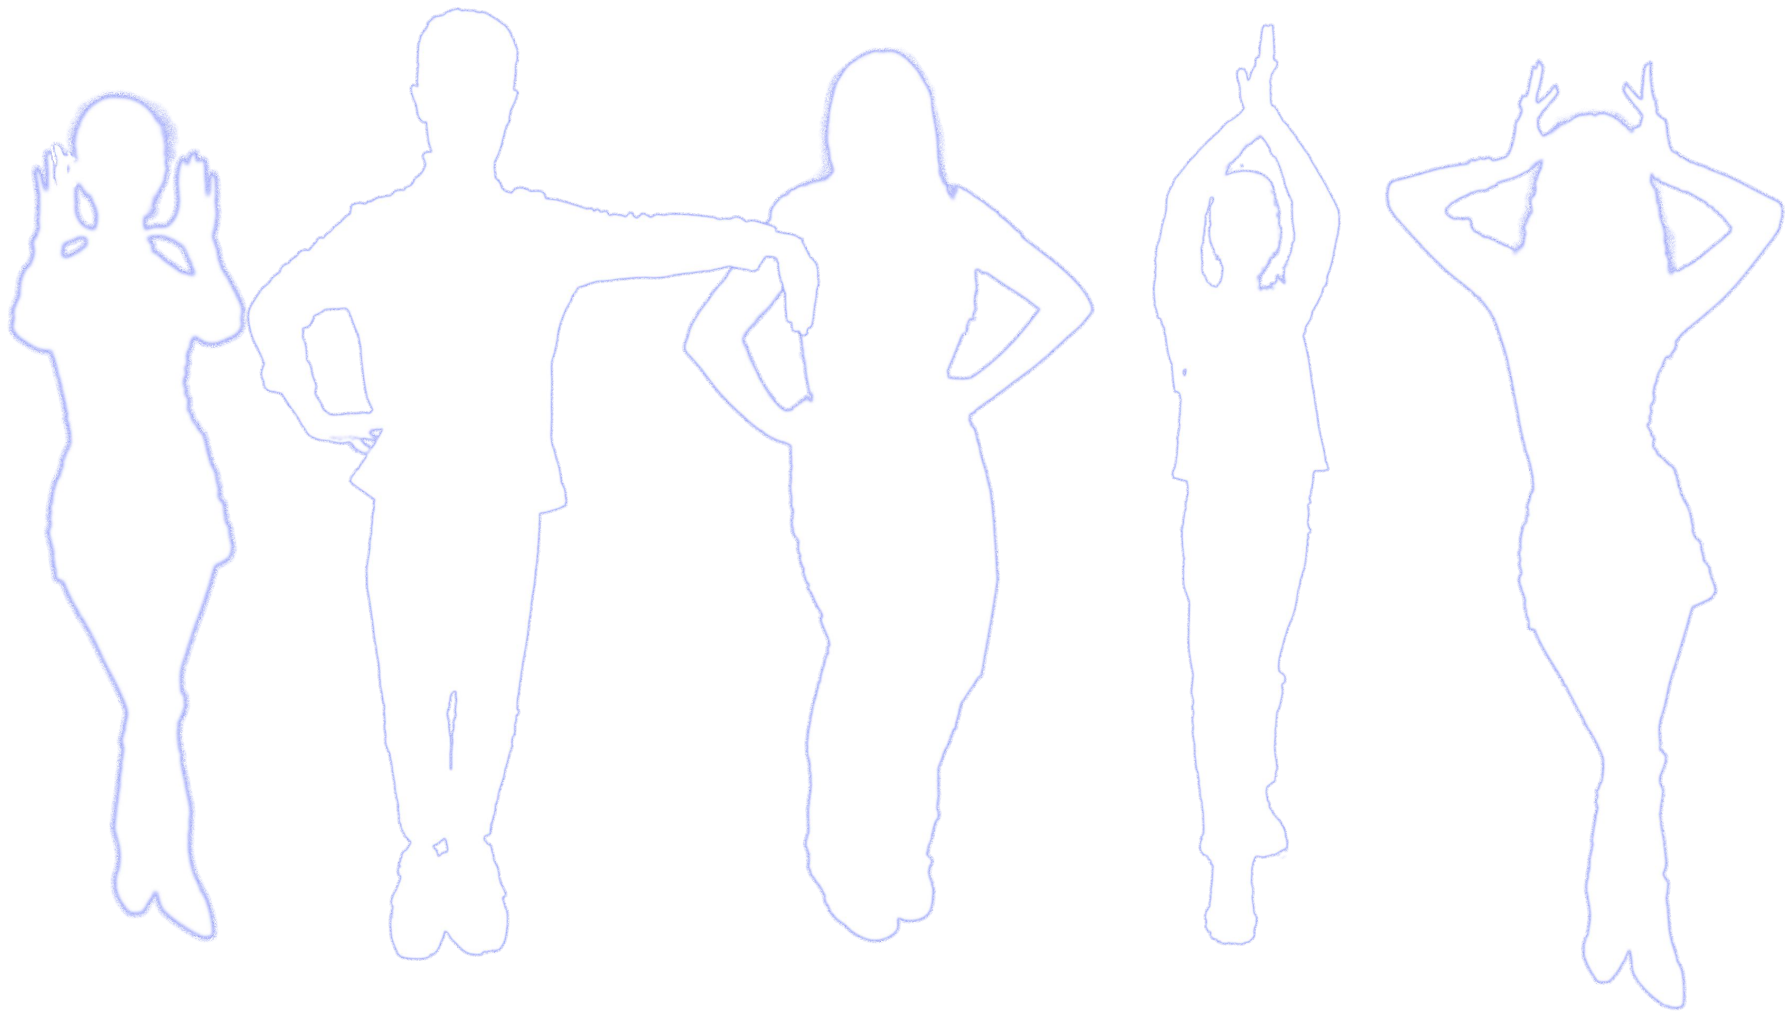

### How to use:

1. **Replace the Model URL:** Make sure to replace `"https://teachablemachine.withgoogle.com/models/2Y1BKGP7Z/"` with the URL of your Teachable Machine model.
2. **Run the Code:** Open an HTML file and paste this code into a `<script>` tag within the HTML.
3. **Allow Webcam Access:** The browser will ask for permission to use your webcam. Allow it.
4. **Follow the Instructions:** The canvas will display the pose you need to perform. Do the pose until it proceeds to the next pose.

+ Great! Now I need it to play an audio along with the text of the |
